

ZEISS F133 LENSES

The Zeiss F133 lenses have this name since about 10 years: their previous name was Zeiss Z1. We can provide standard or customized Zeiss F133 lenses, as Zeiss can tint any Zeiss CR39 lens with no other coating. These lenses cannot be provided in any material different from CR39, they are not polarized lenses. We can provide 3 different types of Zeiss F133 lenses (Standard, Plano Wrap Around, Customized). In the next table you can find the main characteristics.

	Standard	Plano Wrap Around	Customized
Material	CR39/ Polycarbonate	CR39	CR39
Power	Plano (0.00)	Plano (0.00)	Any power obtainable with CR39 (even bifocal or progressive lenses)
Diameter (mm)	65	Any	Any
Thickness (mm)	2	Any	Any
Base Curve	Standard	Any	Any
Notes		Suitable for wrap around	
Price (for 1 pair)	120,00 Euros	296,00 Euros	Depending on the power and base curve (starting from Euros 205,00)

We can provide either uncut lenses, which must be fitted by an optician, or we can cut and fit these lenses into a frame. As the selection of frame is a sensitive point, we prefer to fit lenses on frames provided by the customer. Some of our customers prefer to use frames blocking light coming from the sides: there are two possibilities: wrap around frames and frames with side protection (we enclose two pictures as examples)

	
Photo 1. Wrap around frame: euros 99	Photo 2: Frame with side protection: Euros 99

In frames like Photo1, “Wrap Around lenses” are needed on most of them, while we can put Standard lenses on frames like Photo2. Another possibility is to put the lenses into a clip on like the one in Photo 3: this clip on can be put over the standard prescription lenses. For any further data please send email to info@otticabernabei.com (Prices as 26th Aug 2018: **the prices of frames and clip on do not include the lenses**)
